F. Fernando Jurado-Lasso

[ffjla@dtu.dk](mailto:ffjla@dtu.dk) | [LinkedIn: fdojurado](#) | [people.compute.dtu.dk/ffjla/](http://people.compute.dtu.dk/ffjla/)

I am a postdoctoral researcher at the Department of Applied Mathematics and Computer Science (DTU Compute) within the Embedded Systems Engineering (ESE) section of the Technical University of Denmark (DTU).

## Research Interest

I am passionate about exploring the dynamic realm where Software-Defined Wireless Sensor Networks (SDWSNs) intersect with the power of Machine Learning (ML). This unique fusion of technologies serves as the focal point of my research endeavors. My goal is to address the burgeoning challenges posed by the ever-increasing number of Internet of Things (IoT) devices and applications.

My research is dedicated to overcoming the technological barriers associated with resource management and reconfiguration complexities prevalent in current IoT applications. Delving into the intricacies of networked embedded systems, SDWSNs, ML, and IoT protocols and applications.

Beyond this, my curiosity extends to the application of machine Learning and artificial intelligence for communications and networking. I am enthusiastic about harnessing the potential of these cutting-edge technologies to enhance the efficiency and intelligence of communication systems.

## Keywords

- Internet of Things (IoT)
- Networked Embedded Systems
- Machine Learning (ML) and Artificial Intelligence (AI) for Communications and Networking

## Education

PhD in Engineering & IT Jan 2017 - Dec 2020 The University of Melbourne Thesis: A software-defined networking framework for IoT. Advisor: Prof. Ampalavanapillai Nirmalathas and Mr. Ken Clarke.

MEng in Telecommunications Jul 2014 - Aug 2015 The University of Melbourne First Class Honours Advisor: Mr. Ken Clarke.

BEng in Electronics Aug 2006 - May 2012 Universidad del Valle Thesis: Design and implementation of an AVR (Automatic Voltage Regulator) using programmable hardware for a synchronous generator of up to 4MW. First Class Honours Advisor: Prof. Jaime Velasco-Medina.

## Work Experience

Postdoctoral researcher Oct 2021 - present Technical University of Denmark (DTU) Department of applied mathematics and computer science (DTU compute) Embedded Systems Engineering (ESE) section Copenhagen, Denmark

Description: I serve as the co-Principal Investigator (co-PI) for the Distributed Artificial Intelligence Systems (DAIS) project, a collaborative effort involving 48 partners from 11 European countries. In this pivotal role, I contribute significantly to the project's success by overseeing and actively participating in various key responsibilities and duties including:

Developing research strategies and executing initiatives within the scope of the EU DAIS project.

Utilizing machine learning methodologies to address networking challenges in wireless embedding systems.

Validating research findings through simulation tools such as Contiki-NG operating system, C code, Python, and PyTorch.

Presenting research outcomes at conferences, workshops, industrial gatherings, and open days.

Publishing research articles in reputable journals to contribute to the academic discourse.

Co-leading the university's supply chain management efforts.

Representing DTU and actively participating in project meetings to ensure effective collaboration and communication.

Co-supervising undergraduate and postgraduate students and providing mentorship and guidance in their academic pursuits.

Ph.D. Researcher Jan 2017 - Dec 2021 The University of Melbourne Department of Electrical and Electronic Engineering (EEE) Melbourne, Australia

Description: I investigated the challenges and benefits of Software Defined Wireless Sensor Networks (SDWSNs) as a solution to flexible resource management and reconfiguration of WSNs. My main responsibilities included:

Designing, modeling, and implementing a software-defined management solution for WSNs.

Formulating a mathematical model of energy consumption for SDWSNs to examine the impact on network performance when reprogramming the WSN.

Developing an innovative energy-aware routing algorithm and a new control overhead reduction technique for extending the network lifetime of software-defined multihop WSNs.

Presenting the research findings in industrial gatherings, department level meetings, and highly-regarded peer-reviewed venues.

Hardware Engineer Intern Jan 2017 - Jun 2018 Networked Society Institute (NSI) Department of Electrical and Electronic Engineering (EEE) Melbourne, Australia

Description: The project involved the development and evaluation of an online open-source educational resource to support the teaching and learning of STEM high-school education in Years 9 and 10. This project was supported by Google Australia. My main responsibilities included:

Developing a sensor system to measure environmental temperature, humidity, pressure, and other environmental parameters using Raspberry Pi.

Developing a communication interface to send the collected data to a remote server using the MQTT protocol.

Collaborating with other interdisciplinary team members to plan, execute, and test the system.

Support Engineer Jan 2016 - Dec 2016 Emcali (Empresas Municipales de Cali) Cali, Colombia

Description: I played a crucial role in a groundbreaking project. The project aimed to develop and implement prepaid energy services within smart grid systems. Main tasks in this role included:

Collaborating with other team members to plan, execute, and deliver prepaid electricity services.

Ensuring seamless integration and robust performance of innovative energy solutions.

Providing technical support and troubleshooted issues to enhance the overall efficiency and reliability of prepaid energy services.

Elaborating on the project's documentation.

Research Intern Jan 2015 - Jun 2015 Networked Society Institute (NSI) Department of Electrical and Electronic Engineering (EEE) Melbourne, Australia

Description: I conducted a conceptual study and implemented architectures and technologies related to the Internet of Things (IoT). Main tasks included:

Investigating various publish-subscribe communication protocols.

Working with multiple Unix-based operating systems.

Developing software for the system.

Ph.D. Researcher Jan 2017 - Dec 2021 The University of Melbourne Department of Electrical and Electronic Engineering (EEE) Melbourne, Australia

## Teaching Experience

Guest Lecturer, Operating Systems for IoT Nov 2023 Undergraduate coursework Nov 2022  
Technical University of Denmark (DTU) Nov 2022 Department of Applied Mathematics and  
Computer Science (DTU Compute) Nov 2022

Key Responsibilities:

Delivering engaging and informative presentations.

Sharing insights into operating systems tailored for the IoT.

I facilitated discussions to enhance students' understanding of key concepts in this dynamic field.

Supervisor: A/Prof. Xenofon Fafoutis

Head Tutor, Electrical Network Analysis and Design (ENAD) Jul 2020 - Nov 2020 Undergraduate coursework The University of Melbourne Department of Electrical and Electronic Engineering (EEE)

Key Responsibilities:

Designing and implementing a comprehensive workshop delivery plan for the coursework.

Facilitating informative workshops, elucidating complex concepts in electrical networks and hardware design.

Utilizing various hardware tools, including Analog Discovery 2, and simulation tools such as LTspice.

Providing guidance to students on theoretical principles and practical applications in electrical networks and hardware design.

Addressing and resolving students' queries while maintaining meticulous records through the University's learning management system.

Leading a team of demonstrators by assigning responsibilities and establishing marking criteria for workshops.

Managing records of students' assessment results, ensuring accuracy and confidentiality.

Contributing to the grading process for final exams, maintaining high standards of evaluation.

Supervisor: Prof. Ampalavanapillai Nirmalathas.

Head Tutor, Embedded System Design (ESD) Jul 2020 - Nov 2020 Postgraduate coursework  
Jul 2019 - Nov 2019 The University of Melbourne Jul 2019 - Nov 2019 Department of Electrical  
and Electronic Engineering (EEE) Jul 2019 - Nov 2019

Key Responsibilities:

Providing students with comprehensive guidance on theoretical concepts in embedded systems, hardware design, and simulation problems.

I was proficient in utilizing C language, Visual Studio, Eclipse, and LabVIEW.

I addressed students' queries effectively and maintained meticulous records through the University's learning management system.

I led a team of demonstrators by assigning responsibilities and establishing marking criteria in workshops, fostering a collaborative and effective learning environment.

I managed accurate records of students' assessment results, ensuring confidentiality and precision.

I contributed to the grading process for final exams, upholding rigorous standards of evaluation.

Supervisor: A/Prof. Gavin Buskes

Head Tutor, Analog and Digital Electronics Concepts (ADEC) Mar 2019 - Jun 2019 Undergraduate coursework Mar 2018 - Jun 2018 The University of Melbourne Mar 2018 - Jun 2018 Department of Electrical and Electronic Engineering (EEE)

Key Responsibilities:

Providing expert guidance to students in the modeling and analysis of linear time-invariant behavior in electrical and electronic systems, spanning both time and frequency domains.

Supervising and mentoring students in designing, constructing, and testing passive and active electrical networks, ensuring they achieve specified linear time-invariant behavior.

Instructing students on utilizing software tools for simulating the behavior of linear electrical networks, enhancing their practical skills.

Overseeing and guiding students in applying fundamental concepts and tools for the analysis and design of combinational and sequential logic systems.

Fostering an appreciation for the role and limitations of crucial digital abstractions.

Training students in configuring and testing digital hardware development platforms within laboratory settings.

Maintaining meticulous records of students' assessment results and diligently grade final exams.

Supervisor: A/Prof. Gavin Buskes

## Software

- Contiki-NG-SDWSN: The OS for Next Generation SDN-IoT network. Contiki-NG-SDWSN is an SDN-based solution for WSNs. It focuses in making the sensor network reprogrammable. [code]
- ELISE: The SDN-based solution for the next generation of IoT networks. ELISE is built upon multidisciplinary research efforts of Software-Defined Networking (SDN), Wireless Sensor Networks (WSNs), and Machine Learning (ML). [code] [web]
- PyNetSim: PyNetSim stands out as a robust wireless sensor network simulator specifically crafted for the evaluation of LEACH-based protocols, including traditional LEACH and its variants like LEACH-C. Developed in Python, this tool provides a versatile and accessible platform for researchers and students to test, analyze, and refine their clustering algorithms in the context of wireless sensor networks. [code]

## Skills

### Applications

Altium Designer, LATEX, LabVIEW, MS Office, OrCAD PSpice, Wireshark

### Language

- Spanish (Native)
- English (Proficient)

### Programming

- Python
- C Code
- MATLAB
- Git
- PyTorch
- Java

- Contiki-NG

## **Skills**

### **Progammimg**

- Python 4.5/5
- C Code 4/5
- MATLAB 4/5
- Git 4/5
- PyTorch 3.5/5
- Java 4/5
- Contiki-NG 4.5/5

### **Language**

- Spanish (Native)
- English (Proficient)

### **Applications**

- Altium Designer nan/5
- MS Office nan/5
- LabVIEW nan/5
- Wireshark nan/5
- OrCAD PSpice nan/5
- LATEX nan/5

## **Professional Service**

### **Journal Reviewer**

- IEEE Internet of Things Journal
- IEEE Sensors Journal
- Journal of Network and Computer Applications
- Ad Hoc Networks, Elsevier
- Sensors, MDPI
- Eletronics, MDPI
- Transactions on Emerging Telecommunications Technologies, Wiley
- International Journal of Communication Systems, Wiley

- IEEE Journal of Selected Areas in Sensors

### **Conference Reviewer**

- IEEE Global Communications Conference (GLOBECOM)
- National Conference on Communications (NCC)

### **Professional Memberships**

- IEEE Member (2021)
- National Professional Council of Electrical, Mechanical Engineering and Related Professions, Colombia (2012)
